Oasis Addiction Center Earns Five-Star Patient Ratings Amid Rising Demand for Care

August 10, 2026

NEW YORK, NY - August 10, 2026 -

Oasis Center, a private addiction treatment facility in Manhattan, has earned consistent five-star ratings from patients even as demand for addiction services continues to climb across New York City. The recognition reflects patient feedback tied to the center's medically supervised detox, residential rehab, and outpatient recovery programs.

The facility operates a 24-hour confidential helpline and provides a full continuum of care that includes medical detox, residential inpatient rehab, partial hospitalization, intensive outpatient, standard outpatient, medication-assisted treatment, and dual diagnosis care for co-occurring mental health conditions. Every service is available seven days a week, and the center accepts most major commercial insurance plans.

The strong ratings arrive during a period of increased need for treatment in the region. Rising rates of substance use disorders across the metropolitan area have placed pressure on treatment providers, and patient reviews indicate that the center's structured programs and round-the-clock clinical support have

contributed to positive outcomes. A sampling of patient feedback can be viewed among the center's published five-star reviews.

A spokesperson for Oasis Center in New York said the ratings reflect the daily work of the clinical team. "The feedback comes directly from individuals and families who have moved through the recovery process here," the spokesperson said. "It confirms that a compassionate, evidence-based approach makes a measurable difference for people seeking help."

The center's medical detox program manages withdrawal from alcohol, opioids, benzodiazepines, and stimulants under continuous medical supervision. Its inpatient program offers a structured residential environment with around-the-clock clinical care, while outpatient and intensive outpatient options allow patients to maintain work and family responsibilities during treatment. The intensive outpatient track provides more than nine hours of therapy each week, including evening sessions.

Dual diagnosis care addresses substance use disorders alongside underlying mental health conditions, and the medication-assisted treatment program pairs FDA-approved medications such as Suboxone, Vivitrol, and methadone with ongoing counseling. Together, these services form a coordinated approach intended to support each stage of recovery.

The spokesperson added that the growth in patient volume has not altered the facility's core commitment. "Oasis addiction center treatment in NYC has always centered on treating every person with respect and dignity," the spokesperson said. "Even as more people reach out, that standard remains the foundation of the work."

Oasis Center offers free confidential assessments, including same-day evaluations, for individuals considering treatment. The clinical team remains available at all hours to guide prospective patients and their families through the intake process and to determine the level of care that best fits each situation.

Oasis Center is a private addiction treatment facility based in Manhattan, New York City. The center provides medical detox, residential inpatient rehab, partial hospitalization, intensive outpatient, standard outpatient, medication-assisted treatment, and dual diagnosis care. Its clinical staff operates 24 hours a day, seven days a week, and the facility accepts most major commercial insurance plans. The organization is dedicated to delivering compassionate, evidence-based care to individuals and families affected by drug and alcohol addiction.
