Kelco Cabinets Announces Family-Driven Mission to Transform Kitchen Remodeling in Springfield Missouri

May 29, 2026

SPRINGFIELD, MO - May 29, 2026 -
Kelco Cabinets, a custom cabinet and kitchen remodeling company serving Southwest Missouri, has formally announced its founding mission to bring personalized, high-quality cabinetry solutions to homeowners throughout the region through an innovative mobile consultation approach that prioritizes customer convenience.

Founded by Preston Kelsch, the Springfield-based company emerged from recognizing a significant gap in the local market for truly customized cabinet solutions that combine traditional craftsmanship with modern convenience. Rather than requiring customers to navigate crowded showrooms or make decisions based on limited samples, Kelco Cabinets pioneered a mobile sample trailer system that brings the showroom experience directly to customers' homes.

This approach reflects the company's core philosophy of putting family values and customer relationships at the center of every project. As a family-owned business, Kelco Cabinets understands that kitchen renovations

represent more than just home improvements?they create spaces where families gather, memories form, and daily life unfolds.

"When we started this company, we recognized that homeowners in Southwest Missouri deserved better than one-size-fits-all cabinet solutions," said Preston Kelsch, founder of Kelco Cabinets. "Our mobile consultation model allows families to envision their dream kitchens in the actual space where they'll be installed, making the selection process more intuitive and personal."

The company's growth trajectory aligns with increasing demand for custom kitchen remodeling in Springfield Missouri and surrounding communities. Recent industry data shows that homeowners are increasingly prioritizing kitchen renovations as they seek to enhance both functionality and home value. This trend has been particularly pronounced in Southwest Missouri, where a growing population and robust housing market have created sustained demand for quality remodeling services.

Kelco Cabinets distinguishes itself through its commitment to bespoke design solutions that accommodate diverse style preferences and budget requirements. The company's in-home consultation process enables customers to see and feel material samples in their own lighting conditions, ensuring that selections complement existing home aesthetics.

"Every kitchen tells a story, and our role is to help families write the next chapter," added Kelsch. "By bringing samples directly to homes across the region, we eliminate the guesswork and help customers make confident decisions about their investments."

The mobile sample trailer represents just one aspect of the company's customer-focused approach. Each project receives personalized attention from design through installation, with experienced craftsmen ensuring that every detail meets exacting standards.

As a cabinet company in Springfield Missouri, Kelco Cabinets serves an extensive area throughout Southwest Missouri, including Bolivar, Willard, Ozark, Republic, Battlefield, Nixa, Branson, Stockton, Pleasant Hope, and Rogersville. The company specializes in custom kitchen cabinetry, countertop installation, flooring solutions, and complete kitchen renovations. Their comprehensive approach handles all aspects of kitchen transformation, from initial design consultation through final hardware installation, providing homeowners with a seamless remodeling experience that reflects both quality craftsmanship and the family values that define the company's mission.
